

Pengzhi Gao

CONTACT INFORMATION	Xiaomi Campus No. 33 Xierqi Middle Road, Haidian District, Beijing, China 100085	<i>Mobile:</i> (+86) 15810512592 <i>Email:</i> gpengzhi@gmail.com <i>Homepage:</i> https://gpengzhi.github.io/
EDUCATION	Rensselaer Polytechnic Institute , Troy, NY, USA Ph.D., Electrical Engineering, August 2013 - December 2017 University of Pennsylvania , Philadelphia, PA, USA M.S., Electrical Engineering, September 2011 - May 2013 Xidian University , Xi'an, China B.S. (with honors), Electronic and Information Engineering, August 2007 - July 2011	
WORK EXPERIENCE	Senior Algorithm Engineer & Tech Lead Manager Large Language Model Team, Xiaomi, Inc. , Beijing, China Supervisor: Wei Liu and Jian Luan • Led a cross-functional UI Agent & Agentic RL team of fifteen researchers, engineers, and interns to build native GUI Agent models that deliver one-step direct action capabilities in XiaoAi, enabling the assistant to autonomously complete multi-step GUI tasks from user instructions. • Developed many-to-many multilingual machine translation models, GemmaX (NAACL 2025), which became the top trending model in Hugging Face's machine translation category, gaining over two hundred thousand downloads, and supporting real-time subtitle translation systems in XiaoAi Translate.	June 2024 to Present
	Staff Research & Development Engineer Natural Language Processing Department, Baidu, Inc. , Beijing, China Supervisor: Dr. Zhongjun He • Developed a unified multilingual sentence representation model, MuSR, that supports more than 220 languages (EMNLP 2023 Industry Track), which is used as the foundation model for the similarity-based bitext mining system in Baidu Translate. • Proposed a simple but effective training strategy to boost the zero-shot performance of multilingual neural machine translation (ACL 2023 Findings). Developed data processing and model training pipelines and improved the multilingual machine translation system that supports more than 200 languages in Baidu Translate. • Designed Bi-SimCut, a simple but effective training strategy that boosts the performance of neural machine translation (NAACL 2022). Developed a training pipeline based on Bi-SimCut and improved the machine translation system in Baidu Translate.	September 2020 to June 2024
	Data Scientist / Machine Learning Engineer Core Machine Learning Team, Petuum, Inc. , Pittsburgh, PA, USA Supervisor: Dr. Tong Wen and Dr. Zhiting Hu • Designed and implemented a machine learning library for Petuum AI Builder Platform. • Designed and developed Texar-PyTorch (gaining over 745 stars on GitHub), an open-source machine learning and text generation toolkit based on PyTorch. Maintained and contributed to Texar (gaining over 2390 stars on GitHub), an open-source machine learning and text generation toolkit based on TensorFlow. • Designed and developed Forte (gaining over 250 stars on GitHub), a toolkit for building natural language processing pipelines, featuring cross-task interaction, adaptable data-model interfaces and many more (EMNLP 2020 System Demonstrations).	February 2018 to April 2020

Research Intern

December 2010 to May 2011

Internet Media Group,
Microsoft Research Asia, Beijing, China
Supervisor: Dr. Feng Wu and Dr. Chong Luo

- Analyzed the data collected from 54 sensors deployed in Intel Berkeley Research Lab to exploit the temporal correlations in sensor readings. Developed a joint source network coding scheme for approximate data gathering in the wireless sensor network.

SKILLS

- **Research:** Generative AI, LLM/VLM-based Agents, Machine Learning, Natural Language Processing, Signal Processing, High-dimensional Statistics
- **Programming:** Python > C/C++ = Matlab > Java = R
- **Software:** PyTorch, TensorFlow, Keras, Scikit-learn, Linux, MacOS, Git

HONORS AND AWARDS

- North America Finalist of IBM Watson Build Challenge 2017
- Paper selected as runner-up for the Best Paper in Electric Energy Systems Track at Hawaii International Conference on System Sciences 2015
- Founders Award of Excellence (top 1%) 2015
- Paper selected as one of the Best Conference Papers on Power System Analysis and Modeling at IEEE Power & Energy Society General Meeting 2014
- Excellent Graduate of Xidian University (top 1%) 2011
- National Scholarship (top 0.2% nationwide) 2010
- First prize of the College Academic and Technological Scholarship (top 2%) 2008 - 2010
- Excellent Student Award (top 1%) 2008

PREPRINTS & TECHNICAL REPORTS

PROJECTS

Forte: A Data-Centric Framework for Composable NLP Workflows

Core Machine Learning Team,
Petuum, Inc., Pittsburgh, PA, USA

- Forte is a toolkit for building NLP pipelines, featuring composable components, convenient data interfaces, and cross-task interaction. Forte designs a universal data representation format for text, making it a one-stop platform to assemble state-of-the-art NLP/ML technologies, ranging from Information Retrieval and Natural Language Understanding to Natural Language Generation. Forte was originally developed at CMU and is actively contributed by Petuum in collaboration with other institutes. I am one of the main contributors to Forte.

Texar-PyTorch: A Modularized, Versatile, and Extensible Toolkit for Text Generation

Core Machine Learning Team,
Petuum, Inc., Pittsburgh, PA, USA

- Texar-PyTorch is a toolkit aiming to support a broad set of machine learning, especially natural language processing and text generation tasks. Texar-PyTorch provides a library of easy-to-use ML modules and functionalities for composing whatever models and algorithms. The tool is designed for both researchers and practitioners for fast prototyping and experimentation. Texar-PyTorch was originally developed and is actively contributed by Petuum and CMU in collaboration with other institutes. I am one of the main contributors to Texar-PyTorch.

PROFESSIONAL ACTIVITIES & SERVICE

- Member of IEEE, 2018 - present. Member of ACL, 2022 - present.
- Area Chair:
The Association for Computational Linguistics Rolling Review (ACL ARR).
- Journal Reviewer:
IEEE Transactions on Signal Processing,
IEEE Transactions on Audio, Speech and Language Processing,

IEEE Transactions on Smart Grid,
 IEEE Transactions on Automatic Control,
 IEEE Transactions on Power Delivery,
 IEEE/ACM Transactions on Networking,
 IEEE Signal Processing Letters,
 Annals of Mathematics and Artificial Intelligence,
 Journal of Data-centric Machine Learning Research (DMLR).

- Program Committee Member / Conference Reviewer:
 - The Conference on Uncertainty in Artificial Intelligence (UAI),
 - The Annual AAAI Conference on Artificial Intelligence (AAAI),
 - The Conference on Neural Information Processing Systems (NeurIPS),
 - The International Conference on Learning Representations (ICLR),
 - The International Conference on Machine Learning (ICML),
 - The Association for Computational Linguistics Rolling Review (ACL ARR),
 - The Annual Meeting of the Association for Computational Linguistics (ACL),
 - The Conference on Empirical Methods in Natural Language Processing (EMNLP),
 - The Annual Conference of the North American Chapter of the Association for Computational Linguistics (NAACL),
 - The Conference of the European Chapter of the Association for Computational Linguistics (EACL),
 - The International Conference on Computational Linguistics (COLING),
 - The Conference on Language Modeling (COLM),
 - The China National Conference on Computational Linguistics (CCL),
 - The CCF International Conference on Natural Language Processing and Chinese Computing (NLPCC),
 - SIAM International Conference on Data Mining (SDM),
 - The ACM SIGKDD Conference on Knowledge Discovery and Data Mining (KDD),
 - IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR),
 - IEEE/CVF International Conference on Computer Vision (ICCV),
 - The European Conference on Computer Vision (ECCV),
 - British Machine Vision Conference (BMVC),
 - IEEE International Conference on Communications, Control, and Computing Technologies for Smart Grids (SmartGridComm),
 - American Control Conference (ACC),
 - Intelligent System Applications to Power Systems Conference (ISAP),
 - International Conference on Intelligent Multilingual Information Processing (IMLIP).
